We understand your cargo. We plan your route.

İnsa Trade Company is an international logistics and foreign trade company headquartered in Reyhanlı, Hatay, Türkiye.

With contact points in Istanbul, Dubai and Medina, we serve international transport needs with a particular focus on the Gulf countries.

We assess each request by cargo type, volume, route and delivery requirements, bringing suitable transport options together.

- 01** Cargo-specific transport planning
- 02** Route and equipment coordination
- 03** Direct and clear communication

İdris Tekin

Founder and General Manager

Your direct contact for international partnerships and transport enquiries.

The right vehicle for your cargo.

From palletised commercial goods to temperature-sensitive products, we build the transport plan around the shipment.

Curtainsider transport

Vehicle planning for palletised, packaged and general commercial goods, considering loading requirements and the route.

Refrigerated transport

Options for temperature-sensitive cargo, based on the required temperature range, loading conditions and delivery schedule.

Flatbed transport

Assessment of dimensions, weight, load securing and equipment for cargo unsuitable for standard enclosed vehicles.

Container connections

Road transport coordination between ports, terminals, collection points and destinations.

Connected transport modes. A coordinated plan.

For containerised and high-volume cargo, we consider ocean, rail and road connections together.

Ocean freight

Coordination of port selection, container type, sailing availability and road connections for import and export cargo.

Rail freight

Container and wagon options assessed against terminal connections, cargo dimensions and delivery requirements.

Intermodal solutions

Combining transport legs, terminal transfers and last-mile requirements within one coordinated plan.

Solutions shaped by time and dimensions.

Air freight

For time-sensitive shipments, we assess cargo characteristics, volumetric weight, airport connections and flight availability.

Project logistics

For machinery and non-standard cargo, we consider dimensions, route restrictions, equipment, permits and loading and unloading conditions.

A useful quotation starts with clear information. Share the cargo dimensions, weight, photos and required delivery date.

Connecting business across Türkiye and the Gulf.

We focus on the transport needs of international trade, with all Gulf countries as a priority.

From a transport enquiry to a practical plan.

01

Describe your cargo

Share the commodity, packaging, quantity, dimensions and weight.

02

Define the route

Confirm origin, destination, cargo readiness and the required delivery date.

03

Review the options

Consider transport modes, vehicle or container requirements, terminals and available departures.

04

Confirm the plan

Agree the quotation scope, operational details and required documentation.

Useful information to bring to our meeting

Cargo list · Dimensions and weights · Cargo photographs · Origin and destination addresses · Delivery schedule · Temperature or special equipment requirements

Service scope, routes, equipment and departure availability are confirmed during quotation. Images are illustrative.

Let's discuss your next business opportunity.
